

Testing the Hella Blinker

Style # 91/22-20
6v 2X20w

The battery must be up. 6+ volts
Low battery or small turn bulbs,
and the handle light won't light.

Two contacts will require cleaning.
Some of the rivets have developed
resistance. Clean and solder.

1.2 watt
This simulates
the bulb in the stalk

Two 18 or 20 watt bulbs, to simulate turn bulbs.
Bases solder together as well as the ends.
